Clear thinking in a complex world

## ICM Poll for No2ID

**Fieldwork dates:** 25-26<sup>th</sup> June 2008

**Interview Method:** Telephone, unless otherwise stated.

**Population effectively sampled:** All adults aged 18+ in Great Britain

**Sampling Method:** Within each government office region a random sample of telephone numbers was drawn from the entire BT database of domestic telephone numbers. Each number so selected had its last digit randomised so as to provide a sample including both listed and unlisted numbers.

**Sample size:** 1007 adults aged 18+

**Data weighting:** Data were weighted to the profile of all adults aged 18+ (including non telephone owning households). Data were weighted by sex, age, social class, household tenure, work status, number of cars in the household and whether or not respondent has taken a foreign holiday in the last 3 years. Targets for the weighted data were derived from the National Readership survey, a random probability survey comprising 34,000 random face-to-face interviews conducted annually.

**Questions:** The computer tables attached in PDF format show each question, in full, in the order they were put to respondents, all response codes and the weighted and un-weighted bases for all demographics and other data including but not limited that published .

**Further enquiries:** [martin.boon@icmresearch.co.uk](mailto:martin.boon@icmresearch.co.uk)
